ELECTION OF SPECIES

- 1)** Claims 1 and 2 are under prosecution.
- 2)** Instant claims are generic to a plurality of disclosed patentably distinct species comprising antigen species: (a) A carbohydrate antigen (class 536); and (b) A carbohydrate antigen mimetic including a peptide (class 530). See claim 1. The two species require individual non-coextensive searches in different classes.

Applicants are required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should Applicants traverse on the ground that the species are not patentably distinct, Applicants should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the Examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C 103(a) of the other invention.

- 3)** Papers related to this application may be submitted to Group 1600, AU 1645 by facsimile transmission to the PTO Fax Center at (571) 273-8300, which receives transmissions 24 hours a day and 7 days a week.
